Session dossier

Untangling engine record · timestamps to the minute · math anchors for scalar-knot analysis

Session ID	019f4df4-e329-72e2-825d-f5f62d484947
Title	3D Objects Lattice Codebase Implementation Query
Start (UTC)	2026-07-10T21:35:00Z · unix 1783719300
End (UTC)	2026-07-10T21:35:00Z · unix 1783719300
Date	2026-07-10 → 2026-07-10
Duration	0.28 minutes
Dossier written	2026-07-21T12:53:51.958827Z
Commit	sha256 d246f8e5993c337e…
Schema	session_dossier.v4_chord_knot
Chord commitment	chord-mag-hands-0cf64c47e4

Chord struck

Commitment: chord-mag-hands-0cf64c47e4 · Framework root: e11937d605a89b022d13…

1 · Plain English

This session worked the knot around: mag_hands, dashboard. Latest operator pressure: “@3D Objects lattice”. Not a finished mirror — a living record of what was actually turned.

2 · Personal impact

Your future self’s ability to recall *what you were thinking* depends on this biographer trail.

3 · Rope

Latest pressure from operator: “@3D Objects lattice”

4 · Loops audited

- None flagged in extract.

5 · Disentangled moves

- 1. Re-read this dossier before inventing new epics next session.
- 2. Check scrum board if republic tickets were in flight.
- 3. Full transcript remains in ~/.grok/sessions/.../chat_history.jsonl
- 4. Keep Steiniger as method inspiration — not a required AI persona to ship.
- 5. One disentangled next action only; refuse capture via rank/token/core.

6 · Self-audit

Self-audit: no obvious polish/enthrone flags in extract; still re-check personal impact.

Observer charts (interference is signal)

- ■ **Money machine** (score 0) — Quiet steering of option sets / capital / who can afford the path
- ■ **Secrets machine** (score 0) — Silence, leverage, asymmetric info, private data gates
- ■ **Fracture machine** (score 0) — Narrative inversion, headline conversion, attention break
- ● **Personal rope** (score 1) — Operator’s own knots that make one story feel obvious (self-side first)

A · Scalar-knot anchors (analysis)

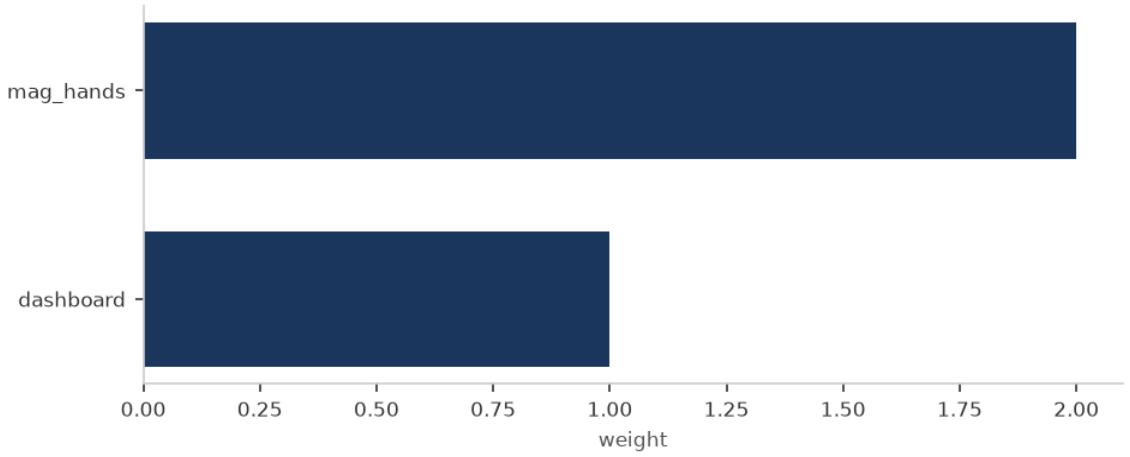
Proxies for later untangling (Steiniger-inspired). Not a full EUT solve. Use with minute timestamps for time-series comparison across sessions.

S_core (convention)	-8.0
β target	3.0

tension_index	0.328105
residual_weight	0.0
frame_occupancy	0.25
Q_proxy	2.5
gap_proxy	0.5
λ■_proxy	0.25
E_dirichlet_proxy	0.215278
theme L1 / L2	3.0 / 2.2361
theme entropy (nats)	0.636514
theme concentration	0.693901
dominant theme	mag_hands
duration (min)	0.28

Theme weight vector (fixed basis)

```
mirror_meta=0 mag_hands=2 scrum_plan=0 constitution=0 dashboard=1 harness=0 biography=0 data_r0=0
```



B · Untangling read (plain language)

What was under pressure

• Latest pressure from operator: “@3D Objects lattice”

Frames held

● **Build / tools** — What was being constructed (code, process, Mag).
■ **Mirror / self** — How this relates to sovereign mirror & chord practice.
■ **Capture risk** — Where a new throne, toy theater, or data leak could form.
■ **Personal stake** — What future-you needs from this session (recall, clarity).

Protected core

• Truth-only, personal impact — no flattery-as-product
• No new throne / rank / token privilege
• Operator data as identity source (not third-party persona as product)
• Consent and private tiers stay local

Residual bonds (keep)

Collapse risks

- Treating Mag todo-completion as if the mirror product were finished
- Collapsing multi-repo work into one “AI agent” brand story

Good moves

- Re-read this dossier before inventing new epics next session.
- Check scrum board if republic tickets were in flight.
- Full transcript remains in ~/.grok/sessions/.../chat_history.jsonl
- Keep Steiniger as method inspiration — not a required AI persona to ship.
- Keep Mirror (meta) above Hands (chores) in the mental model
- Use dossier PDF + JSON as the high-fidelity residual of the session
- Attribute Steiniger methods; do not ship Saelis as required identity

C · Salient operator asks

- <user_info> OS Version: windows Shell: powershell Workspace Path: C:\Users\foste Today's date: 2026-07-10 Note: Prefer using relative paths over absolute paths as tool call args when possible. </user_info>
- <system-reminder> The following skills are available for use: - check-work: Check your work with a verification subagent that reviews diffs, runs builds and tests, and evaluates correctness. Read this file for instructions Use when: asked to "check work", "verify changes", "self-verify", "/check-work", "/check", "/verify", or "/self-verify". Absolute path: C:\Users\foste\.grok\skills\check-work\SKILL.md - create-skill: Interactively create a new Grok skill (SKILL.md + optional scripts/references
- <system-reminder> MCP servers connected: - github (91 tools) - gmail (16 tools) - google_calendar (8 tools) - google_drive (5 tools) - notion (15 tools) - tasks (6 tools) To use MCP tools, you MUST call `search_tool` first to retrieve the tool's input schema before calling `use_tool`. NEVER guess parameter names — always use the exact schema returned by `search_tool`. </system-reminder>

D · Metaphors & ideas

F · Open loops

- Re-read this dossier before inventing new epics next session.
- Check scrum board if republic tickets were in flight.
- Full transcript remains in ~/.grok/sessions/.../chat_history.jsonl
- Keep Steiniger as method inspiration — not a required AI persona to ship.

Appendix · Machine index

Prefer sibling .dossier.json for computers. PDF is human scan. Time fields: time.*.iso_minute, time.*.unix_minute. Math: scalar_knot.*
